## SUMMARY

Fresh Graduate Software Engineering student (graduating November 2026) with experience in full-stack software development, IT governance, and AI data annotation. Completed a 24-week Internal Audit internship supporting IT compliance, disaster recovery, and governance initiatives, alongside freelance work in AI model evaluation and bilingual (Malay-English) data annotation. Adaptable, detail-oriented, and eager to contribute to innovative software engineering teams.

## EDUCATION

|                                                                                                    |             |
|----------------------------------------------------------------------------------------------------|-------------|
| <b>Bachelor of Software Engineering with Honours</b>   University Malaysia Sarawak   CGPA: 3.12    | 2022 - 2026 |
| <b>Foundation in Physical Science</b>   University Malaysia Sarawak   CGPA: 3.18                   | 2021 - 2022 |
| <b>Malaysian University English Test</b>   Band: 4.0                                               | 2022        |
| <b>Malaysia Certificate of Education (SPM)</b>   Sekolah Menengah Kebangsaan Agama Tun Ahmad Zaidi | 2020        |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |      |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Hand Gesture Controller for Navigation Gameplay   Zenith Driven</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 2026 |
| <ul style="list-style-type: none"><li>Developed a full-stack hand gesture recognition system using Python, OpenCV and MediaPipe libraries as a controller built with an HTML/JS frontend and Aiven hosted MySQL database.</li><li>Trained a custom MediaPipe Model Maker classifier using a dataset of 1,400+ labelled hand gesture images across 7 gesture classes, achieving 90% recognition accuracy for a real-time computer vision application</li><li>Applied software engineering practices (RAD) and produced structured technical documentation throughout the project development lifecycle with Microsoft Words.</li></ul> | 2024 |
| <b>Digital Platform Development Group Project   Mr Lowat Bakery Apps</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |      |
| <ul style="list-style-type: none"><li>Developed a Flutter mobile app integrated with Firebase to manage inventory, orders and customer information for Mr. Lowat Bakery</li><li>Built a companion bakery website using CSS, PHP, JavaScript and a SQL database to support online orders and customer interactions.</li><li>Combined both platforms into one connected digital presence covering in-app ordering, inventory tracking and web-based customer engagement.</li></ul>                                                                                                                                                      |      |

## ADDITIONAL PROJECTS

|                                                                                                                                                                                                          |      |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>Healthcare Web Application   Med ID</b> A working demo connecting patient records across Malaysian clinics and hospitals using HTML/JS for Healthcare Hackathon 2026                                  | 2026 |
| <b>QR-based Event Web Application   MemoryLane</b> Full-stack event platform for real-time photo upload and live gallery display (HTML/JS, Node.js, MongoDB, Firebase Storage, WebSockets)               | 2026 |
| <b>Service-Learning Project (SULAM)   AI Literacy &amp; Scratch Workshop</b> Facilitated AI/Scratch workshops for primary school students, including chatbot creation and interactive Kahoot assessments | 2025 |
| <b>UI/UX Designer   Carlo Rino UI/UX Competition</b> Designed an e-commerce UI/UX prototype in Figma as part of a 4-member team.                                                                         | 2024 |
| <b>Learning Game   Java</b> Built a Java quiz game teaching introductory C programming concepts.                                                                                                         | 2024 |
| <b>UI/UX Project   UNIMAS Shop</b> Prototyped a digital shop platform focused on usability and accessibility.                                                                                            | 2024 |

## EXPERIENCES

|                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                         |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| <b>DataAnnotation   AI Training Data Contributor (Freelance)</b>                                                                                                                                                                                                                                                                                                                                                                                    | May 2026<br>- Present   |
| <ul style="list-style-type: none"><li>Designed 3 complex system prompts to train and benchmark AI model behaviour in bilingual (Malay and English) settings for Beryllium Project.</li><li>Evaluated models responses against internal accuracy metrics and instruction-following criteria.</li></ul>                                                                                                                                               |                         |
| <b>Permodalan ASSAR Sdn. Bhd. (Amanah Saham Sarawak)   Intern</b>                                                                                                                                                                                                                                                                                                                                                                                   | Mar 2025<br>- Sept 2025 |
| <ul style="list-style-type: none"><li>Completed a 24-week internship in the Internal Audit Department, assisting with GTRM documentation and operational audit support while gaining exposure to IT governance and corporate audit practices.</li><li>Supported DRP testing by verifying file backups, reviewing the cloud retrieval process, and checking system integration between internal systems and vendor-managed infrastructure.</li></ul> |                         |

- Managed data entry for investor, sales, and dividend records (SGPA, HQ counter, corporate sales) in compliance with FIMM regulations, applying Excel formulas to automate calculations and improve reporting accuracy.
- Performed monthly cash counts for Finance and Operations, reconciling figures against the daily cash balance, cash book, and general ledger.
- Assisted in preparing and formatting board papers for AAMSB, ASSB, and the CGRM GACC meeting.
- Contributed UI and content structuring suggestions for the company website to strengthen user engagement with investment-related content.

**Sarawak Information Systems (SAINS) | ICT Support Service**

**Aug 2024**

- Volunteered for SUKMA Games XXI 2024 providing onsite ICT support at the shooting range venue
- Delivered 3 hardware setup, system monitoring, troubleshooting, and issue reporting over the 8-day event period to ensure smooth venue operations.

**AFD Facilities Resources | Data Collector**

**Sept**

**2023**

- Recorded and categorized over 2 buildings with defects by severity as part of a 12-member team under the supervision of AFD Facilities Resources (Malaysia) engineers, contributing to structured building audit UTM2 reporting.

**AWARD & ACHIEVEMENT**

|                                                                                                       |             |
|-------------------------------------------------------------------------------------------------------|-------------|
| <b>1st Runner Up AI Healthcare Hackathon 2026</b>   Built a AI Healthcare against 17 teams in 6 hours | <b>2026</b> |
| <b>Dean List for Semester 7 2025/2026</b>   GPA: 3.59                                                 | <b>2026</b> |
| <b>Dean List for Semester 4 2023/2024</b>   GPA: 3.53                                                 | <b>2024</b> |
| <b>3rd Place XLION Mini Handball Tournament</b>   Competed as a team for UNIMAS Hornbill              | <b>2025</b> |
| <b>3rd Place Volleyball Athena's League 2024</b>   Competed in Inter-block sports tournaments.        | <b>2024</b> |

**CERTIFICATION & TRAINING**

|                                                                                             |
