

Company Primer (Group 1)

1. Introduction

Welcome to IHH Healthcare Berhad ("IHH" or "the Group")! As a key part of our global team, you are joining one of the world's leading integrated healthcare networks, spanning over 140 facilities across 10 countries—including key markets in Malaysia, Singapore, Türkiye, and India. Driven by our overarching purpose to **"Touch Lives, Transform Care"** and guided by our brand promise, **"Care. For Good."**, every role here contributes to delivering exceptional care across the entire medical continuum. Whether supporting primary care or complex quaternary treatments across our premier hospital brands—such as Acibadem, Fortis, Gleneagles, Mount Elizabeth, Pantai, and Parkway—you are now part of a dedicated workforce tackling major global healthcare challenges, setting new clinical standards, and making a lasting difference in the lives of the patients and communities we serve.

2. Strategic Vision & Competitive Gap Analysis

As a new member of our team, understanding where we stand in the global healthcare landscape helps contextualize why your daily contributions matter. Our overarching vision is **to be the world's most trusted healthcare services network**. To maintain this position, we continuously evaluate our competitive environment, address operational hurdles, and execute strategic solutions.

2.1 Competitive Positioning

We operate as Asia's largest hospital operator by market value and one of the largest global healthcare networks, backed by over 70,000 talented employees. Our strength lies in our multi-brand portfolio including Acibadem, Gleneagles, Mount Elizabeth, Parkway, Fortis, Prince Court, Pantai, and Island Hospital. It is our capacity to deliver integrated healthcare services seamlessly across diverse international markets.

2.2 Gap Analysis & Challenges

While our market position is strong, operating a premier healthcare network comes with complex industry-wide challenges that we actively work to overcome:

- **Operational Demands:** Hospitals operate 24/7, resulting in energy demands that are, on average, 2.5 times higher than those of typical commercial buildings.
- **Global Health Threats:** We must confront systemic medical challenges such as Antimicrobial Resistance (AMR), recognized by the World Health Organization as a top global public health threat.
- **Climate Resilience:** We must protect our critical healthcare infrastructure and ensure uninterrupted service delivery against acute and chronic physical climate risks, such as extreme weather events and water stress, while managing the transition to a low-carbon economy.

2.3 Strategic Response

To close these operational gaps and future-proof our network, we rely on proactive innovation and environmental stewardship:

- **Digital Transformation:** We leverage advanced health technologies, having successfully provided over 8 million patients with online access to their medical records and integrating artificial intelligence into diagnostics and patient safety workflows.
- **ESG Integration:** We embed sustainability directly into our governance and business strategy, linking more than 80% of non-financial targets in our Balanced Scorecard to executive and managerial remuneration. This ensures that every

milestone toward our Net-Zero by 2050 goal reinforces, rather than compromises, our commitment to clinical excellence.

3. Purpose & Operational Excellence

3.1 Purpose

IHH Healthcare's purpose, "Care. For Good.", reflects its commitment to improving the health and well-being of patients and communities through high-quality healthcare. As a new employee, this purpose helps us understand what IHH stands for and how our work contributes to making a positive difference. It focuses on providing safe, compassionate, and patient-centred care, while creating value for patients, employees, communities, and other stakeholders.

IHH brings this purpose to life by maintaining high standards of clinical quality and patient safety, improving the patient experience, developing healthcare professionals, and embracing innovation and digitalisation. Every employee has a role to play in supporting this purpose, whether through direct patient care or by contributing to the daily operations that support healthcare services. Ultimately, "Care. For Good." reminds us that our work is not only about delivering healthcare, but also about making a meaningful and lasting difference in people's lives.

3.2 Operational Excellence

At IHH Healthcare, operational excellence means making sure that patients receive safe, high-quality, efficient, and consistent healthcare services. As a new employee, understanding these areas can help us see how our daily work contributes to IHH's overall performance and patient care.

1. Quality and patient safety

- Maintaining high standards of clinical care and patient safety.
- Monitoring clinical outcomes and identifying areas for improvement.
- Reducing risks and improving the overall quality of care.

2. Operational efficiency

- Improving hospital processes and workflows.
- Optimising the use of healthcare resources, facilities, and capacity.
- Improving efficiency while maintaining high standards of patient care.

3. Digitalisation and technology

- Adopting digital technologies to support healthcare delivery.
- Using data and technology to improve decision-making and operational processes.
- Enhancing the patient experience through digital healthcare solutions.

4. Continuous improvement

- Regularly monitoring operational performance.
- Identifying opportunities to improve processes and services.
- Sharing best practices across IHH's healthcare network.

5. People and talent development

- Developing the skills and capabilities of healthcare professionals.
- Providing training and development opportunities for employees.
- Supporting employee engagement to strengthen the quality of healthcare delivery.

4. Organizational Values & Culture Focus

4.1 Core Values:

IHH Healthcare stands with 5 core values:

- **Patients First:** Placing patient safety, comfort, and clinical outcomes at the heart of every decision.
- **Integrity:** Maintaining transparency, ethical standards, and accountability across all business practices.
- **Empathy:** Listening actively and showing genuine compassion to patients, families, and team members.
- **Teamwork:** Collaborating seamlessly across departments, specialties, and global borders to deliver unified care.
- **Excellence:** Striving continuously for higher standards in clinical quality, service delivery, and operational efficiency.

4.2 Stakeholder Commitments:

IHH's strategic vision balances commitments across key stakeholder groups:

Stakeholder Group	Core Focus
Patients	Empowering healthcare choices through safe, compassionate, and high-value care.
Employees	Shaping a supportive, inclusive workplace that prioritizes well-being, growth, and safety.
Partners & Shareholders	Delivering sustainable value through strong governance, financial discipline, and strategic growth.
Communities & Environment	Nurturing public health, expanding care access, and advancing Net-Zero environmental goals.

Table 1. Key Stakeholder Groups

4.3 Workforce Engagement & Talent Retention:

IHH actively invests in career advancement and leadership development programs:

- **I.GLOBE Program:** The *IHH Global Leadership of Business Enterprise* framework focuses on building executive capabilities in patient-centricity, business growth, and ecosystem partnerships.
- **Project Nightingale:** An initiative dedicated to sustaining nursing excellence, professional development, and long-term retention.
- **IHH Learning Academy:** Provides continuous educational opportunities, skill development, and training modules to help employees keep pace with evolving medical tech and digital workflows.

4.4 Employee Total Well-being & Recognition:

IHH recognizes that its people are its greatest asset, ensuring that employee health and overall well-being are prioritized as foundational to organizational success.

- **Workplace Well-being:** Centered around three strategic pillars, Culture (prioritizing safety and care), Workplace (open communication where every voice is valued), and Support (mental health resources to navigate work stressors). This framework is backed by clear performance metrics:

- Safety: Zero workplace fatalities across the Group and a Lost Time Incident Rate (LTIR) reduced to 1.15.
- Engagement: Outperforming international benchmarks by placing 3% above the Global Healthcare average in Employee Engagement Surveys (EES).
- Nursing Growth: Surpassed the 10% target by expanding the global nursing talent pool by 14% against the baseline.
- **Milestone & Quality Recognition:** Formal recognition programs, including group-wide excellence awards and service milestone honours, are in place to celebrate team dedication, operational resilience, and clinical achievements.
- **Diversity & Inclusion:** IHH views diversity as a core enabler of quality patient care, increased productivity, and employee retention. The strategy spans five key dimensions: Gender, Generational, Differently Abled, Skillset, and Cultural , which are operationalised through the following mechanisms:
 - Strategic Integration & Benchmarking: DEIB goals are embedded directly into performance metrics and measured against global equity benchmarks while honouring local socio-cultural nuances across operating markets.
 - Gender Parity in Leadership: Targeted a 50:50 gender ratio in leadership roles, achieving 49% women in leadership positions across the organisation.
 - Culturally Empathetic Care: Building multi-generational and multi-cultural teams that directly reflect regional patient demographics to improve doctor-patient communication and clinical treatment outcomes.

5. Technology, Innovation & ESG Integration

5.1 Digital Transformation & Skill Readiness

- **AI Diagnostics & Efficiency:**
IHH continues to integrate AI and digital solutions into healthcare to improve speed, accuracy and patient experience. AI is being used to support medical imaging, including chest X-rays, brain CT scans and mammography, while digital medical records and other technologies help make care more connected and efficient. With the deployment of automated AI bill estimation systems (achieving 92% accuracy), which provides transparency of medical finance to our patients.
What this means for you:
Young employees are encouraged to build digital skills, adapt to new technologies and look for ways technology can improve efficiency and reduce unnecessary processes and resource use.
- **Advanced Clinical Capabilities:**
Innovation directly powers our clinical teams. We continuously invest in training and upskilling our medical, nursing, and operational personnel on cutting-edge medical systems. This includes Asia's first exploration of Upright Photon Therapy for precision cancer treatment, alongside advanced Proton Beam Therapy, Gamma Knife radiosurgery, and next-generation robotic surgical systems that minimize invasiveness and accelerate patient recovery time.
What this means for you:
Being future-ready means staying curious, continuously learning and being open to new technologies that can improve healthcare outcomes.
- **Workforce Readiness:** We harness data analytics to uphold rigorous international care standards through our Value-Driven Outcomes (VDO)

Framework. Having expanded our Clinical Quality Indicators (CQIs) from 113 to 170 across core procedures, we are scaling toward 236 CQIs. Furthermore, we utilize digital Patient-Reported Outcome Measures (PROMs) to gather direct patient feedback, allowing care teams to customize treatment plans while streamlining frontline administrative workloads.

What this means for you:

Developing data literacy and digital skills enables young employees to contribute to better decision-making, efficiency and continuous improvement.

5.2 Sustainability & Responsible Care

IHH's sustainability strategy extends beyond environmental protection. It focuses on delivering responsible healthcare while creating positive impact for **patients, people, the public and the planet**.

- **Net-Zero Roadmap:**

Our commitment to care extends to the planet. We integrate Environmental, Social, and Governance (ESG) principles into our workplace culture and operational decisions as part of our Group-wide roadmap to achieve **Net-Zero carbon emissions by 2050**. This is supported by comprehensive Scope 1, Scope 2, and Scope 3 greenhouse gas baseline tracking across all facility operations.

- **Sustainable Facilities:** We are scaling solar installations and energy efficiency across Malaysia and Hong Kong, while a large-scale solar project in Türkiye is expected to meet up to 80% of *Acıbadem*'s annual energy needs to reduce our reliance on fossil fuels.

- **Environmental & Safety Standards:**

IHH is reducing environmental impact through initiatives such as achieving more than 90% reduction in single-use virgin plastics in non-clinical areas across Malaysia, Türkiye, Singapore and Hong Kong. The Group also continues to strengthen its Antimicrobial Stewardship Programme (ASP), with antimicrobial resistance interventions implemented across its hospitals in line with Centers for Disease and Prevention (CDC) guidelines to promote responsible antibiotic use and protect patient safety.

5.3 What Sustainability Means for a New Joiner

Sustainability is not only the responsibility of senior management or dedicated ESG teams. **Every employee can contribute.**

As a new joiner, you can support IHH's sustainability strategy by:	
Think digitally	Use digital solutions where they improve efficiency and reduce unnecessary paper or resources.
Use resources responsibly	Be mindful of energy, water, materials and waste in your workplace.
Learn continuously	Develop the digital and technical skills needed for a changing healthcare environment.
Innovate	Look for practical ways to improve processes and reduce inefficiencies.
Act responsibly	Follow safety, ethical and environmental practices in your daily work.
Think beyond your role	Consider how your decisions affect patients, colleagues, communities and the environment.
